Comments for services

1. For the " Transfers with driver" it doesn't work well. There will be one table, above the rows of which there will be the number of seats, that is fixed information. The directions in the left column are variable, they must be added. According to what you have prepared, there are some tables that are not correct.
2. I didn't understand how does work " Car to Airport" section.
3. In hotel section – is the date for prices fixed? It need to be variable too.
4. In the hotels and also for tour, what is included I see, but what about what doesn't included? As you can see in XD file, what is included is mentioned in green, what doesn't included mentioned in red.
5. How we will write information for the keypoints in hotel and accessories sections?
